

DAS.4

SU01 | User Manual

Requirements:

Android 5.0 and above IOS 9.0 and above
Supports Bluetooth BT 3.0 

APP download: M2 WEAR

- IOS/Android phone users: Scan the QR code to download and install the application.
- Android: Search for “M2 wear” through Play Store to download and install the application.
- Apple: Search for “M2 wear” through the App Store to download and install the app.

Initial use

- To ensure the normal use of the watch, please charge it first.
- Connect the poles of the cable to the poles of the watch.
- Note: The reverse contact point will cause the battery to short-circuit.

Watch and APP connection

- Please accept all permissions requested by the application for its smooth operation. The watch must be connected to the application to access all its functions.
- Connecting with the Application: Open the

app and make sure you have Bluetooth and GPS enabled on your phone. The app prompts you to give permission for notifications. Tap add device, search for device name, and select it to connect to.

- Bluetooth connection: Bluetooth must be enabled on the watch. Enter the Bluetooth of the mobile and look for the name of the device. Select pairing.

- Simple solution to common Bluetooth problems: Due to the lack of uniformity in the Bluetooth protocol of various mobile phone brands, sometimes the Bluetooth connection between the mobile phone and the watch can be unstable. You can turn off the Bluetooth of the mobile phone and reconnect it or reset the watch to the factory settings. You can also press and hold the power button for 10 seconds to restart the clock.

Watch functions

- Keyboard: Connect to your mobile phone to make Bluetooth calls from your watch.

- Contacts: Once the clock is successfully connected to the application, you can add contacts through the application and synchronize with the clock. You can call your saved contacts directly from the watch.

- Call log: You can view the history of calls made.
- Application notifications: The notifications received on the mobile phone will also be sent to the watch.
- Exercise: In the sports menu (running, walking, cycling, climbing) select an exercise and the recording of exercise time, distance, calories and heart rate will begin.
- Pedometer: Record the steps of the day. The data is reset every time at midnight.
- Sleep Recording: Activate Sleep Recording to get a picture of its quality.
- Sedentary life reminder: Set the reminder, the clock will vibrate and display an alarm.
- Oscilloscope: Position the watch correctly on your wrist and measure your heart rate.
- Pressure: Position the watch correctly on your wrist and measure your pressure.
- Oxygen Measurement: Position the watch correctly on your wrist and measure the oxygen in your blood.
- Remote photo: Take a photo remotely by giving the command from your watch.
- Music: Control your phone music wirelessly.
- Find Mobile: Select the feature and your mobile will ring to locate it.
- Weather: See the temperature of the day.
- Stopwatch: Record time.

- Alarm clock: Set the alarm clock from the application and the clock will vibrate at the time you set to alert you.
- Settings: You can turn vibration on / off
- Style: You can change the style of the user interface.
- Info: Find the MAC address, Bluetooth name, and device version.
- Change brightness: Change the brightness depending on the environment.
- QR Code: Scan and download the application.
- Reset: Reset your device to its factory settings.
- Torch: Open the lens and the screen will be at maximum brightness and white.
- Language: You can change the language from the watch as well as from the application
- Change dial: Enter the dial setting through the application. You can view your current dial and select another one from the list.

Disclaimer

1) Please ensure that Bluetooth and mobile GPS are turned on. When searching for the device via Bluetooth, make sure that no other device is connected. When searching for the device via Bluetooth, keep a close distance between your mobile and smartwatch.

2) If the Bluetooth connection is unstable during operation, try restarting the watch and connecting it to the mobile again. Be sure to turn on the automatic start for the smartwatch application, in the settings of your mobile phone. Also turn off the battery optimization (without restrictions) for the specific application, so that the continuous application-smartwatch communication is not interrupted.

3) If there is a problem with the watch or its use, please contact the store where you purchased it.

4) The measurements of the watch are for reference only and not for medical use. Please follow your doctor's instructions and do not use the measurements to make your own diagnosis.

5) The watch is waterproof with IP67 certification which means that it can withstand accidental contact with water. However, it can not be used for diving or being under water for a long time. In addition, the watch should not come in contact with hot water, as steam can penetrate the seal and cause internal damage.

6) The company has the right to modify the contents of this user manual without prior notice. Some functions differ depending on the software they carry.

7) CAUTION: Do not use a power adapter that

gives more than 5v == 1A to charge the device. If you use a charger larger than 1A for charging, the circuit and / or battery may be damaged.

8) Once the watch is charging, disconnect the cable from the power supply to prevent a short circuit if it comes in contact with conducting objects.

9) Do not leave the peripherals and accessories in areas where the temperature is too high or too low. Otherwise the device may malfunction.

10) Avoid hitting the device to reduce the risk of damage.

**IP67: Dust resistant!
Seawater is prohibited.**

The warranty terms that cover the product are mentioned in details on the official website www.das-4.com.
