# Disclaimer

1) Please ensure that Bluetooth and mobile GPS are turned on. When searching for the device via Bluetooth, make sure that no other device is connected. When searching for the device via Bluetooth, keep a close distance between your mobile and smartwatch.

2) If the Bluetooth connection is unstable during operation, try restarting the watch and connecting it to the mobile again. Be sure to turn on the automatic start for the smartwatch application, in the settings of your mobile phone. Also turn off the battery optimization (without restrictions) for the specific application, so that the continuous application-smartwatch communication is not interrupted.

3) If there is a problem with the watch or its use, please contact the store where you purchased it.

4) The measurements of the watch are for reference only and not for medical use. Please follow your doctor's instructions and do not use the measurements to make your own diagnosis.

5) The watch can withstand accidental contact with water. However, it can not be used for diving or being under water for a long time. In addition, the watch should not come in contact with hot water, as steam can penetrate the seal and cause internal damage.

6) The company has the right to modify the contents of this user manual without prior notice. Some functions differ depending on the software they carry.

7) **CAUTION**: Do not use a power adapter that gives more than **5v = 1A** to charge the device. If you use a charger larger than 1A for charging, the circuit and / or battery may be damaged.

8) Once the watch is charging, disconnect the cable from the power supply to prevent a short circuit if it comes in contact with conducting objects.

9) Do not leave the peripherals and accessories in areas where the temperature is too high or too low. Otherwise the device may malfunction.

10) Avoid hitting the device to reduce the risk of damage.

# FAQ

**1) What can I do if the smartwatch doesn't appear on the list with the available devices?**

First please check if the smartwatch has battery (over 20%). Then place the smartwatch close to the mobile phone and try again. If this problem still exists, please turn OFF and ON the mobiles Bluetooth and try again.

**2) Why is heart rate not being measured?**

To make the measurement correctly, the watch must have good contact with your skin and the hand is not in motion.

**3) Why is the watch not showing the messages?**

You must have the "Access to notifications" permission enabled. You need to check that the message also appears in the notification bar of your mobile. If it is not displayed, the message cannot be forwarded to the watch.

**Caution**: Consult your doctor before starting any new physical activity. Although the watch can measure your heart rate in real time, it cannot be used for medical and diagnostic purposes.

> **The warranty terms that cover the product are mentioned in the details on the website.**
