SMARTWATCHES & WEARABLES

SG48 | User Manual

Introduction

Thank you for choosing our product! Please read the user manual in order to have a complete understanding on the smartwatches features and operation method.

The functions in the user manual may be slightly different from the final product.

Typos and inconsistencies in this manual will be corrected in a timely manner.

If we have updates, this manual will change without notice. Our company reserves the right to revise the manual.

Package: One gift box, one user manual, one smartwatch, one charging cable.

Remark: This model is dustproof and water resistant only at accidental contact with fresh water or rain.

Do **NOT** wear this product when showering or swimming at the sea. The water will surpass the proofing and there is a possibility of shorting the circuit. The warranty does not cover you in case of damage from the above reason.

Buttons Instruction

Top button: Turn the button around to switch between dials. Press the button once to return to the previous screen.

Bottom button: Hold for a few second the button to turn ON/ OFF the smartwatch. Press the button once to return to the homes screen.

Dial: Πατήστε παρατεταμένα την κύρια οθόνη για να εισέλθετε στη λίστα. Περιηγηθείτε αριστερά και δεξιά για να επιλέξετε ένα καντράν.

Charging instruction: this product adopts is using magnetic force charging. Supports **5V= 1A** mobile phone charger and computer USB interface. Put the charging cable to the back of the device's charging pins, it will charge automatically. It usually takes 2 hours to fully charge. Do not use the watch when charging.

Remark: You should place the magnetic charger correctly at the pins. If the charger is not properly aligned with the pins, it will cause the circuit to burn.

Connection

The watch can connect with your phone by downloading the application “**Fundo Pro**” using one of the methods below

1) Android / IOS : Scan the QR code using any scanner, to download the app “Fundo Pro”.

2) Search on Google Play Store / APP Store and download the “Fundo Pro” App.

After installation, turn on phone Bluetooth and GPS. Open the app, confirm the notifications and all others permission “FitCloudPro” asks are enabled, and fill up personal information. Tap “Add device”, search “W3Pro” device (turn on the GPS in the smart phone before binding) and tap connect.

In order to use the loudspeaker and receive/ answer calls via Bluetooth, you must also connect the smartwatch directly with the mobile phones Bluetooth.

Go to Bluetooth--> search for the W3Pro device-->connect it.

For more information on the connection, please turn to our website (www.das-4.com) and search the "Quick Starter Guide" button. There you will find quick and simple steps to connect the smartwatch with your mobile phone.

What is NOT Included in the Warranty Terms?

This warranty does not include:

- Any defects caused by an accident, misuse, abuse, improper installation or operation, lack of reasonable care, unauthorized modification, loss of parts, tampering or attempted repair by a person not authorized by the distributor.
- Any product that has not been installed, operated or maintained in accordance with the manufacturer 's instruction manual provided with the product.
- Any product that has been used for purposes other than the intended use.
- Any damage caused by improper power input or improper cable connection.

Disclaimer

- 1) Please ensure that Bluetooth and mobile GPS are turned on. When searching for the device via Bluetooth, make sure that no other device is connected. When searching for the device via Bluetooth, keep a close distance between your mobile and smartwatch.
- 2) If the Bluetooth connection is unstable during operation, try restarting the watch and connecting it to the mobile again. Be sure to turn on the automatic start for the smartwatch application, in the settings of your mobile phone. Also turn off the battery optimization (without restrictions) for the specific application, so that the continuous application-smartwatch communication is not interrupted.
- 3) If there is a problem with the watch or its use, please contact the store where you purchased it.
- 4) The measurements of the watch are for reference only and not for medical use. Please follow your doctor's instructions and do not use the measurements to make your own diagnosis.
- 5) The watch can withstand accidental contact with water. However, it can not be used for diving or being under water for a long time. In addition, the watch should not come in contact with hot water, as steam can penetrate the seal and cause internal damage.
- 6) The company has the right to modify the contents of this user manual without prior notice. Some functions differ depending on the software they carry.

7) **CAUTION:** Do not use a power adapter that gives more than **5v = 1A** to charge the device. If you use a charger larger than 1A for charging, the circuit and / or battery may be damaged.

8) Once the watch is charging, disconnect the cable from the power supply to prevent a short circuit if it comes in contact with conducting objects.

9) Do not leave the peripherals and accessories in areas where the temperature is too high or too low. Otherwise the device may malfunction.

10) Avoid hitting the device to reduce the risk of damage.

**Only dustproof and only accidental contact with fresh water –
hand washing.**

Seawater is prohibited.

FAQ

1) What can I do if the smartwatch doesn't appear on the list with the available devices?

First please check if the smartwatch has battery (over 20%). Then place the smartwatch close to the mobile phone and try again. If this problem still exists, please turn OFF and ON the mobile's Bluetooth and try again.

2) Why is heart rate not being measured?

To make the measurement correctly, the watch must have good contact with your skin and the hand is not in motion.

3) Why is the watch not showing the messages?

You must have the "Access to notifications" permission enabled. You need to check that the message also appears in the notification bar of your mobile. If it is not displayed, the message cannot be forwarded to the watch.

Caution: Consult your doctor before starting any new physical activity. Although the watch can measure your heart rate in real time, it cannot be used for medical and diagnostic purposes.

The warranty terms that cover the product are mentioned in the details on the website.
